

SIX WORDS THAT DESCRIBE YOU

Pick 6 words that you think describe you. If you can't think of any, ask someone what they think describes you. Use words that are not common vocabulary for you. For each of those six words, you will create a new file in photoshop. Each file should have the following dimensions: **5" x 5"**, **resolution = 150.**

Pick a font that illustrates the meaning of the word, and use **Text Warp** and **Layer Effects** to enhance the word. Choose an image that illustrates the meaning of the word as well. Create a finished, unified composition that puts together each element (word, picture, effects) of the image you create.

Save each word as: word1.psd, word2.psd, word3.psd, etc.
